Income Impact Area—Food Pantry Fact Sheet 2015-2016

INCOME Community Outcomes

The Community Outcomes Project is designed to collectively measure outcomes in specific issue areas. The end result will be that programs addressing similar issues will be able to use the same measurement tool and indicators to better track results across the community over time.

United Way collaborated with its program partners in the area of INCOME—FOOD SECURITY to define common outcomes and indicators. With the assistance of the Manna Food Project, surveys were completed by clients at 13 local pantries.

This report presents benchmark data collected in the first year of the INCOME—FOOD SECURITY Community Outcomes Project. The collection of benchmark data allows United Way an opportunity to begin to identify trends as they occur over time and to gauge the impact of United Way funded programs in our community.

INCOME PRIORITY AREA

Char-Em United Way focuses on **Helping families become financial stable and independent, while ensuring that basic needs are met.** By providing supporting the local Food Bank, we ensure that

Families have support for basic needs, including shelter and food.

United Way funds provided significant support for the Manna Food Project which, in turn, provides food and related products to food pantries throughout Charlevoix and Emmet Counties.

As the data indicate, the local pantries which are supported by Char-Em United Way are making a significant impact on food security needs.

INCOME—FOOD SECURITY Outcomes
